Back-End: Python, REST API Integration, JSON Data Handling, Server-Side Logic, Data Persistence, CRUD Operations, API Consumption

JavaScript Concepts: DOM Manipulation, Event Handling, Array Methods (map, filter, sort, reduce), JSON, Fetch API, LocalStorage, Form Validation

Tools and Version Control: Git, GitHub, VS Code, Chrome DevTools

Programming and Data: Python, NumPy, Matplotlib

Other: E-commerce Development, UI/UX Implementation, Mobile-First Design, Debugging, Problem Solving

PROFESSIONAL EXPERIENCE

Freelance Web Developer | Self-Employed | Chhatrapati Sambhajnagar, Maharashtra | [Start Month Year] - Present

- Designed and developed a responsive e-commerce website for a sarees retail business using HTML5, CSS3, Bootstrap, and JavaScript.
- Built product catalog management with LocalStorage for inventory tracking and order persistence.
- Developed shopping cart features including add-to-cart, quantity adjustment, price calculation, and checkout flow.
- Integrated Fetch API for dynamic product data loading and updates.
- Ensured mobile responsiveness and cross-browser compatibility across Chrome, Firefox, Edge, and Safari.
- Wrote clean, semantic, maintainable code following web development best practices.

PROJECTS

Luxury Restaurant Website | HTML5, CSS3, Tailwind CSS

- Built a responsive multi-page website with hero section, tabbed menu, masonry gallery with lightbox, reservation form, and contact page.
- Applied a custom dark and gold design system using Tailwind CSS utility classes.
- GitHub: <https://github.com/madhavkhatod16/Luxury-Restaurant-Website>

Weather Report Application | HTML5, CSS3, JavaScript, Fetch API, Open-Meteo API

- Developed a weather search app showing real-time temperature, humidity, wind speed, and rainfall for any city.
- Integrated a third-party REST API with asynchronous data fetching and dynamic UI updates.
- GitHub: <https://github.com/madhavkhatod16/weather-report-fetchAPI>

Instagram Clone with LocalStorage | HTML5, CSS3, JavaScript

- Built an Instagram-style social feed with dynamic post creation and data persistence using LocalStorage.
- GitHub: <https://github.com/madhavkhatod16/Add-post-using-localstorage->

Glassmorphism Authentication Interface | HTML5, CSS3, JavaScript

- Designed a responsive Sign Up and Sign In interface with client-side validation, duplicate user checks, and animated backgrounds.
- GitHub: <https://github.com/madhavkhatod16/Glassmorphism-Auth-Flow-Sign-Up-Sign-In->

Web Development Quiz Game | HTML5, CSS3, Bootstrap, JavaScript

- Built an interactive CET-style quiz with progress tracking, score calculation, and result analysis.
- GitHub: <https://github.com/madhavkhatod16/quiz-game>

LinkedIn Clone Website | HTML5, CSS3, Bootstrap

- Built a fully responsive LinkedIn clone demonstrating modern layout and UI design principles.
- GitHub: <https://github.com/madhavkhatod16/linkdin-clone-website->

Bank Management System | Python

- Developed a command-line application supporting account creation, deposits, withdrawals, and balance inquiries.
- GitHub: <https://github.com/madhavkhatod16/-Bank-Management-System-Python-CLI>

Additional Projects: Pair Match Card Game, Typing Speed Game, Guess the Number Game, Tic Tac Toe Game, Solar System Animation, Responsive Calculator, Music Streaming Website Clone. All available at github.com/madhavkhatod16
